

2013 Donor Alliance Fact Sheet

Donor Alliance is the federally-designated, Association of Organ Procurement Organizations (AOPO) and American Association of Tissue Banks (AATB) accredited, non-profit organ procurement organization tissue bank serving Colorado and most of Wyoming. As a recognized leader in facilitating the donation and recovery of transplantable organs and tissues, Donor Alliance's mission is to save lives through organ and tissue donation and transplantation.

To achieve this mission, Donor Alliance employs effective family approach and recovery programs in more than 100 hospitals. Donor Alliance also inspires the public to register as organ and tissue donors through community partnerships, public outreach and education campaigns throughout our donation service area.

Vision Statement: As a center of excellence, Donor Alliance serves all who need transplantation by optimizing available organs and tissues with a commitment to education, collaboration, innovation, and influencing policy.

Fast Facts about Organ and Tissue Donation:

Local stats:

- In Colorado and Wyoming 2,292 people are currently waiting for a lifesaving organ transplant.
- Of those, 1,643 are currently waiting for a kidney – the organ most in need (72%) – and 556 are waiting for a liver (24%).
- 14% of current transplant candidates in Colorado have been on the waiting list for 5 years or more.
- 46% of those waiting for an organ transplant are between 50 and 64 years of age.
- Colorado has one of the nation's highest-performing state donor registries with nearly 67% of driver's license/ID card applicants registering as organ and tissue donors.
- In 2012, Donor Alliance recovered organs for transplant from 126 donors; of those 67.5% were on either the Donate Life Colorado or Wyoming Donor Registry.
- In 2012, Donor Alliance recovered tissue for transplant from 1017 donors; of those 60.5% were on either the Donate Life Colorado or Wyoming Donor Registry.

National stats:

- Today, 117,069 people are waiting for lifesaving organ transplants nationally; an average of 245 people is added to the waiting list each month.
- Recoverable organs include: heart, lung, liver, kidney, pancreas and small bowel.
- Tissues that are recoverable include: bone, tendons and corneas as well veins, valves and skin.
- One donor can save up to eight lives through organ donation and save and heal more than 100 lives through tissue donation.
- Every year, the lives of about 500,000 Americans are saved by organ and tissue donation.
- Of the patients waiting, 15,760 (13%) are in need of a liver transplant. 95,345 people (81%) are in need of a kidney.
- Every 12 minutes another name is added to the national transplant waiting list.
- Approximately 1,500,000 tissue transplants are performed annually.
- More than 6,000 living donations occur each year. One in four donors is not biologically related to the recipient.
