DEFINITION OF PERINATAL HOSPICE

- A philosophy of family- centered care that addresses the expectations and intentions of families who choose to continue a pregnancy after their baby is diagnosed with a life-limiting condition. It includes the broad goals of palliative care: to anticipate, prevent, and relieve suffering (physical, psychological, and spiritual) and preserve dignity and promote quality of life for baby and family, while honoring parental preferences and wishes for their baby's care regardless of length of life.

OBJECTIVES OF PERINATAL HOSPICE

- Provide unconditional support from point of diagnosis and up to 2 years following delivery
- Freedom from fear of abandonment
- Allow parents to fully experience the birth of their child and encourage bonding during the time of pregnancy and beyond
- Parents will know they treasured their baby's life, no matter how long or short
